HIPAA, INFORMED CONSENT, and FINANCIAL AGREEMENT

Read Carefully, this is a Legal Document

Notice of Privacy Practices Acknowledgement

I understand that, under the Health Information Portability & Accountability Act of 1996 (HIPAA), I have certain rights to privacy regarding my protected health information. I have read the Pivotal Injury and Rehab Notice of Privacy Practices. (One copy will be provided upon the patient's request and can also be viewed on the practice website.)

Informed Consent

As with any healthcare procedure, there are certain complications which may arise during chiropractic manipulation and therapy. These complications include but are not limited to: fractures, disc injuries, dislocations, muscle strain, cervical myelopathy, costovertebral strains and separations, and burns. Some types of manipulation of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke. Some patients will feel some stiffness and soreness following the first few days of treatment. We will make every reasonable effort during the examination to screen for contraindications to care; however, if you have a condition that would otherwise not come to our attention, it is your responsibility to inform us. Fractures are rare occurrences and generally result from some underlying weakness of the bone which we check for during the taking of your history, during examination and X-ray. Stroke has been the subject of tremendous disagreement. The incidences of stroke are exceedingly rare and are estimated to occur between one in one million and one in five million cervical adjustments. The other complications are also generally described as rare. Remaining untreated may allow the formation of adhesions and reduce mobility which may set up a pain reaction further reducing mobility. Over time this process may complicate treatment making it more difficult and less effective the longer it is postponed.

Financial Agreement

Please remember that insurance is considered a method of reimbursing the patient for fees put to the doctor and is NOT A SUBSTITUTE FOR PAYMENT. Some companies pay fixed allowances for certain procedures, and others pay a percentage of the charge. It is your responsibility to pay any deductible amount, co-insurance, or any other balance not paid by your insurance. If this account is assigned to an attorney/outside agency for collection and/or suit, Pivotal Injury and Rehab shall be entitled to reasonable attorney's fees and for cost of collection. I authorize the release of any information necessary to determine liability for payment and to obtain reimbursement on any claim.

I certify that I have read and fully understand all of the above information.
